

■ FOUR PILLARS & FORTUNE APIs / B2B

Four Pillars and fortune APIs for your service.

Daily fortunes, Four Pillars data,
Saju readings and compatibility reports.
Choose the APIs you need for your app or website.

These products and prices are planned for 2026.12.01.
Current subscriptions use different pricing.
Existing customers will receive separate migration details.

PRODUCTS AND STARTING PRICES

FORTUNE API ↗

01 Content & Retention

KRW 20 / call · PAYG

Daily fortunes and Chinese zodiac content

02 Manse & SIS Data

KRW 50,000 / month · 500 calls

Professional Manse + SIS · Core starts at KRW 30,000/month

03 Readings & Specialist Results

From KRW 30 / result

Weekly fortunes, Saju, compatibility, date selection and naming

30-day free Sandbox

PAYG with no monthly fee

REST / JSON

Korea & Japan supported

■ AVAILABLE FUNCTIONS

Choose the API you need.

Use fortune content, calculation data and readings separately or together. Saju is the Korean Four Pillars tradition; Manse Core is our calculation API.

01

Content & Retention

Add daily and Chinese zodiac fortunes to home feeds, notifications and events.

Home feeds

Push alerts

Games & events

Returns: short text, scores and keywords
Response: synchronous / no generative AI

02

Manse & SIS Data

Build Saju screens with Core data or detailed analysis including shinsal.

Manse Core

Professional + SIS

Returns: calculation and analysis data (JSON)
Response: synchronous / no generative AI

03

Readings & Results

Show Saju and compatibility readings to customers, or sell them as paid products.

Saju & compatibility

Reports

Naming

Returns: standard or generated readings
Response: synchronous or Callback

Membership app

Daily fortunes in the home feed → Content & Retention

Saju platform

Element and shinsal charts → Professional Manse + SIS

Paid compatibility service

Ready-to-display readings → Readings & Specialist Results

What is included: Core provides calculation data only. Professional Manse + SIS adds advanced analysis and details for 54 shinsal types, traditional Saju indicators. Written readings are separate products.

PRICING

Pay per call or choose a monthly plan.

PAYG uses prepaid points. Each API use deducts the relevant points from your balance. There is no monthly base fee.

Pay as you go · PAYG

Top up any amount from KRW 10,000, excluding VAT

Product	KRW / call, excluding VAT	With 10% VAT*
Content & Retention	20	22
Manse Core	90	99
Professional Manse + SIS	150	165

CORE / STARTER

Manse Core

KRW 30,000 / month

500 calls per month

Four Pillars and element calculations
KRW 60/call if all 500 calls are used
KRW 33,000 with 10% VAT*

PRO + SIS / STARTER

Professional Manse + SIS

KRW 50,000 / month

500 calls per month

Advanced analysis and 54 shinsal types
KRW 100/call if all 500 calls are used
KRW 55,000 with 10% VAT*

PRO + SIS / LAUNCH

Professional Manse + SIS

KRW 89,000 / month

2,000 calls per month

The same data as Professional Starter
KRW 44.50/call if all 2,000 calls are used
KRW 97,900 with 10% VAT*

*10% VAT examples illustrate Korean billing: a KRW 10,000 top-up costs KRW 11,000. Invoice tax treatment is confirmed in the quotation. Subscriptions and point top-ups are separate charges.

Professional Manse + SIS data is identical across plans. Included calls vary. Request rates and support follow the quotation. Full prices: Appendix A.

■ DATA INCLUDED

Manse Core or Professional Manse + SIS

Core returns Four Pillars calculation data. Professional Manse + SIS includes all Core data, advanced analysis and details for 54 shinsal types.

Data	Manse Core	Professional Manse + SIS
Calculation data	Four Pillars, elements, sipseong, 12 growth stages and 10-year cycles	All Core data included
Advanced analysis	Not included	Strength, chart structure, balancing elements, branch relationships and voids
SIS: 54 shinsal types	Not included	Position, state, relative influence and chart data
Written readings / PDF	Separate products	Separate products
Typical use	Basic Saju charts and your own content rules	Advanced analysis, shinsal charts and detailed results

CORE SCREEN EXAMPLE

Saju chart card

Four Pillars

Elements

10-year cycles

Use the calculation data to build your own screens and wording.

PROFESSIONAL + SIS SCREEN EXAMPLE

Analysis and shinsal details

All Core data

+

Advanced analysis

+

Shinsal details

Screen concepts, not sample API fields or values. Check actual responses in the API reference and approved Sandbox.

SIS relative strength: a proprietary Ablecity index from 0-100. It does not represent the probability of an event or statistical prediction accuracy.

READING PRODUCTS

Readings, delivered through an API.

Prices include the calculations needed for each reading. To receive the full Core or Professional Manse + SIS dataset, use the data API separately.

STANDARD READINGS / SYNCHRONOUS

Reviewed text, fixed formats

Readings use predefined text and lengths.
No generative AI; the result is returned in the API response.

GENERATED READINGS / CALLBACK

Longer Saju readings

The generated reading is sent to your Callback URL.
Brand wording, translations and PDFs are quoted separately.

Product	Standard / result	Generated / result	Typical use
Weekly fortune	KRW 30	KRW 200	Weekly cards and alerts
Annual / New Year fortune	KRW 150	KRW 400	Annual content
Saju reading	KRW 300	KRW 700	Summary or detailed reading
Compatibility: two people	KRW 300	KRW 800	Dating and couple services
Annual love fortune	KRW 150	KRW 300	Relationship themes
Annual wealth fortune	KRW 150	KRW 300	Wealth themes

Tojeong reading: KRW 300/result Date selection: KRW 1,000/result Naming: from KRW 5,000/result

Calculation costs are included in the reading price. A separate request for the full Manse dataset incurs a data API charge. Reading lengths and specialist products appear in Appendix B.

■ 30-DAY FREE SANDBOX

Sandbox for testing. Live for production.

We email an initial review and the approved access scope within one business day of submission. Keys are issued after manual review.
Sandbox is available now under v5.0. New paid subscriptions are on hold until 1 December 2026.

01

Apply

Provide your intended APIs, contact details, company URL, proposed screen and expected calls.

02

Receive a Sandbox key

We email your test key, expiry date and approved limits.

03

Test for 30 days

Check responses and integration. Sandbox keys cannot be used for production services.

04

Request a Live key

New paid subscriptions are on hold until 1 December 2026. Agree on APIs and pricing for a separate Live key.

Period	Content	Core / Professional + SIS	Standard results	Generated Callback
30 days	100 calls	1,000 calls combined	20 results combined	5 completed results

Sandbox keys do not become Live keys automatically. Request a separate Live key before serving end users or using the API commercially. Available APIs and quotas may be adjusted after application review.

Apply for API access / free Sandbox ↗

■ ALL PLANS

Monthly plans

Each plan covers one product. Included calls are not shared across product families. Monthly fees below are in KRW, excluding VAT.

Plan	Included calls	Content & Retention	Manse Core	Professional Manse + SIS
Starter	500	Use PAYG KRW 20/call	30,000 KRW 60.00/call	50,000 KRW 100.00/call
Launch	2,000	Use PAYG KRW 20/call	Use Pro Launch Includes all Core data	89,000 KRW 44.50/call
Scale	10,000	99,000 KRW 9.90/call	149,000 KRW 14.90/call	249,000 KRW 24.90/call
Business	50,000	399,000 KRW 7.98/call	479,000 KRW 9.58/call	799,000 KRW 15.98/call
Enterprise	100,000	699,000 KRW 6.99/call	779,000 KRW 7.79/call	1,290,000 KRW 12.90/call
Strategic	500,000	2,990,000 KRW 5.98/call	2,990,000 KRW 5.98/call	3,990,000 KRW 7.98/call

Compare the monthly total

2,000 calls: Core PAYG KRW 180,000; Core Scale KRW 149,000; Pro Launch KRW 89,000 (all Core data). Unit rates assume full use.

High volumes and traffic bursts

For 100,000-200,000 monthly calls or event traffic, we review monthly usage and peak calls per second. Pricing, request rates and support are agreed separately.

Content calls are pooled across approved modules. Annual discounts, subject to quotation: up to 15% for Content; 10% for Core / Professional. Optional operations support starts at KRW 500,000/month. Dedicated infrastructure, 24/7 cover and VPC are separate quotes, not included in API fees.

■ PRODUCT DETAILS

Reading products and included lengths

Lengths below count Korean characters. Translations, longer readings, brand wording and PDFs are quoted separately. Confirm English output availability before ordering.

Product	Standard reading	Generated reading · Callback
Weekly fortune	KRW 30 · 150-300 characters	KRW 200 · 500-1,000 characters
Annual / New Year fortune	KRW 150 · 800-1,200 characters	KRW 400 · 2,000-4,000 characters
Saju reading	KRW 300 · 1,000-1,500 characters	KRW 700 · 4,000-8,000 characters
Compatibility: two people	KRW 300 · 800-1,200 characters	KRW 800 · 3,000-6,000 characters
Annual love / wealth fortune	Each KRW 150 · 500-800 characters	Each KRW 300 · 1,500-3,000 characters

Tojeong · KRW 300	Traditional annual reading using reviewed text One result · synchronous response
Date selection KRW 1,000	Uses the occasion and the parties' Saju charts One set of recommended dates and times within an agreed period
Naming KRW 5,000 / 8,000	Standard: 30 candidates using the subject's chart Premium: 30 candidates using the subject's and parents' charts

Content & Retention modules

- **Available:** Manse Lite, daily fortune, daily Chinese zodiac fortune
- **Pilot:** Sun-sign horoscope and biorhythm
- Short text, scores and keywords; synchronous response
- Calls pooled across approved modules in the same plan
- Bulk distribution and long-term caching require a separate licence

Manse Lite: profile-level chart, zodiac animal and element summary. Full Core data, advanced analysis and SIS are excluded.

Sun-sign and biorhythm content is for entertainment, not professional astrology or medical prediction.

■ BILLING AND CONTRACTS

Payment and operating terms

This guide sets out products and standard prices. Customer-specific terms follow the signed quotation, contract and applicable law. It is an English-language guide; it does not promise English-language API outputs.

Payment and usage

Point top-ups

Top up any amount from KRW 10,000 on the dashboard, excluding VAT. One point equals KRW 1 before VAT.

Validity and refunds

Points are valid for 12 months from top-up. Refunds are unavailable after 7 days. Eligibility and the process within 7 days follow the contract; statutory rights remain applicable.

Billable responses

Synchronous APIs charge for final 2xx success responses; generated jobs charge on completion. 5xx, Ablecity processing failures and Callback redelivery for the same job are excluded. New API requests count separately.

Readings and data charges

Reading prices include the necessary Manse calculation. A separate request for the full dataset incurs a data API charge.

Terms agreed before Live access

Overages and unused calls

December overage rates, usage limits and rollover are stated in the quotation. Check these separately from the current point-deduction rules in the public API reference.

Plan changes and cancellation

Agree on change and cancellation dates, billing dates and whether fees are prorated by days used.

Request rates, support and security

Agree on permitted rates, response-time and availability commitments, incident contacts, support hours, IP restrictions and HMAC options.

Existing customers in December

We compare existing contracts and data fields before migration. Some advanced fields in the current Core contract are not included in the new Core product.

Get a Live key before launch: Sandbox keys are for testing. We review the intended screen, APIs, usage and launch date before issuing a separate Live key.

New customers' top-ups and paid use are on hold before 1 December 2026 and require a separate contract and Live key. Existing paid customers continue under their current contracts.

COUNTRY AND LANGUAGE SUPPORT

Supported markets and data usage

Country availability and output language are separate. Confirm the country, required input data and output language for each API before contracting.

Market	Status	Scope
Korea	Available	Korean content, Manse and SIS
Japan	Available	Japanese fortune and Saju APIs · Check each product's scope
China / Taiwan	Pilot validation	Simplified / traditional Chinese terminology, inputs and content
US / UK / Europe	Partner discussions	Localisation and proposed product scope

Usage licence

- **Included:** display in your service, storage of purchased results and user history, de-identified statistics, and 24-hour caching of shared daily content
- **Separate agreement:** long-term caching, bulk distribution, white labelling, OEM, brand wording and translations
- **Prohibited:** resale of raw responses, key sharing, bulk copying for competing services, dataset construction, model training, reverse engineering and unapproved public benchmarks

Security and technical review

- Keep API keys on your server.
- Incomplete applications may require more information, restricted test access or sample responses.
- Boundary calculations involving solar terms, midnight rules, calendars and birthplace, plus throughput and errors, are reviewed within the approved technical scope.
- Raw-data retention, log masking, deletion, IP restrictions and HMAC options are agreed in the contract.

Examples: Ssehada (ssehada.com) uses Manse, daily fortunes, compatibility and paid reports; the Monkey Shoulder pop-up used kiosk fortune content. Detailed responses and validation materials are provided within approved Sandbox, NDA and contract terms. Content is for lifestyle and entertainment use and should not be the sole basis for significant decisions.
